

DOT 407 412 Haz Mat Tank

Certifications & Compliance

- Fully engineered for strict regulatory compliance: DOT 407 / 412, ASME Certified, and Non-Code specifications
- Heavy-duty structural construction available in premium Carbon Steel or Stainless Steel
- Tombstone-style rollover protection system engineered for maximum field safety

Standard Specifications

- 4" load line mounted on the rear head equipped with a manual lever valve
- Dual 20" manways located on the rear head and top of the tank, complete with primary shutoff and inline in-transit valve
- Precision stainless steel float gauge for active level tracking
- Premium aluminum utility cabinets featuring secure, heavy-duty locking latches
- Full-length structural hose troughs running down each side
- Hose hangers mounted securely to the rear head
- Integrated environmental drain pan positioned directly under all fluid outlets

Pump Package

- NVE, MASPORT, or FRUITLAND premium vacuum pump or high-capacity Hi-Vac Blower packages | System includes secondary shutoff, final filter, heavy-duty gear box, diesel flush kit, and custom mounting bracket
- Heavy-duty "Hot Shift" style Power Take-Off (PTO) drive infrastructure

Accessories & Utility

- High-output LED swivel work lights (front and rear) paired with independent exterior switches housed in a weatherproof enclosure
- LED clearance and tail lighting packages
- Carbon steel structural bolt-on rear bumper

Available Options

- High-volume "Roper" style water pump configurations
- Premium hydraulic hoist lift tank systems
- Full-open rear head designs for rapid cleaning and severe service maintenance
- Extensive selection of secondary operational components and custom layout packages built to order

Truck Chassis Compatibility

- Freightliner, Kenworth, and International commercial chassis options available
