

Slide-In Tanks

Standard Specifications

- Completely self-contained, work-ready design architecture
- Multiple stock sizing configurations: Available in split fresh water / waste combinations or waste-only tank layouts
- In-stock, rapid-deployment capacities: 450, 600, and 950 gallons
- Bespoke custom capacities and tank sizing engineered upon request
- High-visibility 5" sight glasses for precise waste tank monitoring
- Integrated water compartment sight tube for accurate fresh water levels
- Heavy-duty structural hose hangers

Pump & Power Infrastructure

- Premium Masport vacuum pump packages equipped with a reliable electric-start auxiliary engine drive
- 3" high-flow discharge configuration featuring a 3" industrial ball valve
- 2" x 30' rugged suction hose paired with a durable poly suction stinger

Washdown & Electrical Utilities

- High-efficiency 12V water pump system
- Integrated washdown package: Includes heavy-duty water hose, precision pistol nozzle, and a dedicated bucket-fill station
- Low-draw, high-output LED work lighting for secure night and low-light operations
